The Directors of ICFRE Institutes

Subject: Annual work plan of Scientists working in ICFRE and its Institutes

वन अनुसंधान संस्थान, देहरादून
कुल सचिव कार्यालय
डायरी सं. 634
दिनांक 23/03/18

Madam/Sir

All the institutes were requested to finalize the Annual Work Plan of the scientists indicating 8-10 Key Result Areas (KRAs) every year in accordance with the APAR format. These KRAs will be finalized at the beginning of the year in consultation with the reporting authority and after revision of the targets during the midyear, if required, will be furnished to ICFRE (HQ). The issue was also discussed in the Directors' Conference held on 26th February 2018, where the institutes requested for issuing necessary instructions on the activities and format of the KRAs.

This issue has been examined and was decided that though an exhaustive list of activities for the KRAs would be difficult to be prescribed, an indicative list of activities can be given in which the scientist can be assessed. These activities are placed at **Annexure-I**. The reporting officers may also include other areas of work assigned to the scientist other than these activities listed. The quality of the outcomes /targets form an important part of assessment and should be taken into account while assessing the performance at the end of the year. However, the quantification of the targets like the number of projects to be executed, number of PCRs to be submitted, etc., should be incorporated, wherever possible. This should, therefore, be used as an instrument for having the clearly defined targets to assess the performance of the scientists at the end of the year.

The targets finalized for every scientist should also be in alignment with the mandate of the Council. The recent initiatives/priorities of the Council should necessarily be reflected in KRAs so finalized apart from the activities listed in the Annexure. These may include:-
