Subject: Constitution of the Forestry Expert Forum for developing synergy among researchers

Sir/Madam,

Interactions among scientific professionals in various disciplines are important to improve the Synergy in the Research Programmes. The formal and informal discussions on the latest advancements/findings and the research gaps in various fields help in developing better understanding of the research problems to find their solutions. Regular interactions also help to avoid duplication of the research and development efforts. Besides the information exchange, these interactions can also provide insight on the capacity building as well as infrastructure/software needs of the researchers and institutions.

Keeping in view of the importance of such interactions, a forum called the 'Forestry Experts Forum' is hereby constituted with scientists, experts and forest officers of the council. Initially, following broad disciplines are identified based on the mandate of the council

- | | |
|-----------|------------------------------------|
| Group I | Silviculture and Forest Management |
| Group II | Forest Protection |
| Group III | Wood Products |
| Group IV | Chemistry and Bio-prospecting |
| Group V | Ecology and Climate Change |
| Group VI | Forest Genetics and Biotechnology |
| Group VII | Extension |

The Expert Forum is aimed to:

1. Effectively improve the ability of the researchers to critically analyze issues, develop synergy and creative solutions to problems and facilitate deeper understanding of the contemporary research problems
2. Support the peers in developing an analytical thinking in research
3. Highlight the importance of research inputs and outputs to contribute to fill existing gaps and identify new gaps.
4. Engage the researchers in thinking critically about issues based upon an evidence-based interpretation of research.

A list of the scientists/officers included in different groups/forums is enclosed at Annexure I. The Forum would be steered by a convenor and co-convenor(s), as designated until further orders. The IT division (ICFRE) has already been directed to develop a portal after obtaining the suggestions of the Directors/DDGs and other officials of the Council. Meanwhile, the conveners will coordinate with the members and organize regular interactions through video conferencing/other e-forum. The IT division can also be requested by the convenors/co-convenors for assistance in formation of such e- groups.

These expert groups will interact regularly, exchange recent advancements in the field and also synthesize ideas for the proposed research programmes in the Council. The ideas so synthesized will be submitted to the Directors/ICFRE (HQ) by the convenors for necessary action and also shared with the other groups for wider debate and action.

A scientist/officer willing to join any additional groups or change the presently assigned group may request the concerned convenor under intimation to ICFRE and concerned Director. The activities of these groups under the forestry experts forum shall be reviewed by ICFRE twice a year. All the Directors/DDGs are requested to bring this to the notice of all the scientists/officers concerned in the institutes/ directorates.

This issue with the approval of DG, ICFRE.

Yours faithfully,

(N.C. Sarayanan)
